

Canadian Stocks After Market Crashes

Stocks have always recovered & have often risen swiftly to new highs.

Three examples.

ONTARIO
SECURITIES
COMMISSION

Early 80s Stock Market Crash

Dot-Com Bubble Burst

2008 Global Financial Crisis

Disclosure:

The charts and figures contained herein are based on historical total return data beginning January 1, 1935, unless otherwise indicated, and ending at the most-recent year end for which data are available. They are for illustrative purposes only; they do not constitute investment advice and must not be relied on as such. They assume the reinvestment of all investment income, and no transaction costs or taxes. Portfolios are neither real, nor recommended.

An investment cannot be made directly in an index. Government bonds and Treasury bills are guaranteed by the full faith and credit of the Canadian government as to the timely payment of principal and interest, while stocks are not guaranteed and have been more volatile than the other asset classes shown. International Stocks exclude U.S. Stocks. International stocks involve special risks such as fluctuations in currency, foreign taxation, economic and political risks, liquidity risks, and differences in accounting and financial standards. **Past performance is not an indicator of future performance.** © 2024 Investments Illustrated, Inc.
